

## Using the Cosmetic-Converter

### What do I need to know?

You can put your Cosmetic-Converter wherever you store your cosmetics. Leave the Converter to work for a minimum of 24 hours or, even better, leave it permanently.

### How long does the Chip last?

It has a service life of at least 30 years.

### i-like Meta-Converterd are:

100% Swiss engineering  
100% Swiss made

Ask about our free application brochure, full of tips and explanations.

The bottom line: the good properties of your cosmetics can be significantly improved with the Cosmetic-Converter.

## Who and what is the Cosmetic-Converter for?

The Cosmetic-Converter is suitable for body, face and decorative cosmetics.

- in your beauty case
- in the wardrobe
- in the bathroom cabinet
- in your handbag
- on the dressing table
- on the table in the bathroom
- in your toilet bag
- in the shower
- in the glove compartment next to your hand lotion
- and more

Ask about further Meta-Converters (chips) and the energetic bioresonant vital products from i-like.

# The Cosmetic-Converter vitalises cosmetics

Activate and vitalise your cosmetics. Incorporate an amazing bioresonance frequency into your normal cosmetics and bodycare.

The bioresonant Cosmetic-Converter neutralises the potentially negative frequencies of cosmetics. Via the quantum physical effect of frequency regulation, the effectiveness of all kinds of cosmetics can be improved significantly. Potentially negative properties like allergy triggers, dehydration, feelings of tension and so on can be eliminated.

The Converter is effective if left for a minimum of 24 hours or, ideally, permanently and a max. distance of

50cm from your cosmetics. It is irrelevant whether you place it next to your cosmetics in the bathroom cabinet, in the shower next to the shower gel and shampoo, in the glove compartment next to your hand cream or by the sink next to the hand soap. There are many possible applications.

The Converter's efficacy is sadly considerably less when there are parabens (synthetic preservatives) or silicone (mineral oil) in the cosmetics.

# This is what users say, who have tested the Converter:

- I love a citrus scent in my shower gel, body lotion and other cosmetics. Unfortunately however, I do not get along well with the fragrance which is used for this purpose. My skin gets red and itchy. Now I am using the Cosmetic-Converter, I have dared to buy myself a new lemon-scented shower gel, with great success. My skin no longer reacts to the shower gel. I have even been able to switch my body lotion and hand cream to an orange scent. Really great!
- A mineral powder has always been my perfect solution for a matte complexion. Unfortunately powder like this leaves dry patches on my face. Now I have activated it with the Converter from i-like, the problem is solved.
- For years I have struggled with my sensitive skin. As soon as I use cosmetics that my skin doesn't tolerate, I begin to see my eczema regularly. This is very tedious as I must always double check what is in the product. Since I have installed the new Converter at home, I have not noticed any more reactions. I am surprised that such a small chip can do so much.
- Over the years I have used the same body oil But my skin has never been as soft as it is now since I installed the Converter.

## Good to know!

The Cosmetic-Converter has a sphere of activity from 0-50 cm. It can also be left in its case (instead of fixing it to something) and used in a variety of places. The converter is washable and can also easily be installed in the shower... Its effectiveness is further strengthened through metal, and it can, for example, also be attached underneath a metal container (shower cubicle, beauty case etc.) or similar. The Cosmetic-Converter should be protected from extreme heat (over 50 degrees Celsius).

The bottom line:  
Potentially negative frequencies in your cosmetics are neutralised. It can improve the effects of your cosmetics, and neutralise negative properties.

The i-like Cosmetic-Converter is scientifically monitored by the Health Campus at St. Elisabeth University and other institutions.
