What do I need to know?

The philosophy behind regeneration is based on three pillars: clean, nourish, and balance. i-like cosmetics work as a system and are coordinated.

1. Clean your skin using the foam.
2. Nourish the skin with day & night cream.
3. Regenerate your skin with vital serum, the mask, and the repair serum if your skin is irritated. The PiFu tea is the perfect accompaniment.

True beauty comes from within!

The combination of the latest Swiss Bioresonance technology, values of Asian regeneration philosophy and phyto-healing and Western, modern science have created products that are unique worldwide.

High quality, purity and naturalness are equally important for all ingredients used. All cosmetic ingredients are balanced according to the basic principle of the five-element teaching in Yin-Yang. The latest findings of cosmetic research are taken into account in the same way, in accordance with decades of traditional recipes and wisdom.

Bioresonance helps to reconcile the body with its tasks of nature and its health. In particular, Bioresonance recognises and promotes the self-repair ability of the skin. Self-regulation is significantly increased through use of i-like beauty and personal care that activate Bioresonance. The skin can regenerate and the radiant power is significantly increased.

Well-being, beauty and good energy :

Active Repair Serum

Active Repair Serum promotes the regeneration of your skin cells. It also helps regulate skin irritation. New cells are revitalised and help problem areas achieve a harmonious state based on the underlying principle of self-regulation. We recommend using Pifu tea along with the Active Repair Serum.

Hyaluron Vital Serum

Hyaluronic acid is considered a true miracle in the field of beauty. Long-chain hyaluronic acid provides a large amount of moisture and can penetrate deep into the skin sub layers. Thus a pad is formed. The skin looks firmer and more vital. The sustained positive effect on wrinkles and reduction in wrinkles formation leaves no wish unfulfilled.

FeelGood mask

The moisturising formula gives a radiant, smooth facial skin. Plant stem cells can activate the self-regeneration of skin cells. The self-decomposition of the skin is slowed down and thus counteracts skin ageing. The result is a new, finer skin structure.

Moisturising Day Cream

The skin is intensely moisturised. The valuable ingredients contribute significantly to a balanced and even skin texture and help protect the skin from external influences. Discover the care, protection and moisture that radiate through your facial skin. Bioresonance care for your face so that you can enjoy minute of your day.

Regenerating Night Cream

Night is the building and recovery time of the body. The unique i-like bio-resonance technology in the night cream activates cell regeneration and boosts skin regeneration. In this way, the structure of the skin can be actively supported and the facial reflex zones optimally balanced. The result is seen in the recovered and regenerated facial skin in the morning. Think of night as a skin wellness time with the i-like regeneration night cream.

Cleansing foam

The delicate foam cleanses particularly mildly yet effectively. It also removes makeup, cosmetics and moisturises naturally. In addition, it nourishes the skin, acts as a moisturising agent and keeps it in a healthy balance. Skin repair properties have a calming effect even with irritated skin.

PiFu-Tea

The Pifu-tea blend is a master formula. Pifu means „skin“. The skin is classified in the metal element and from the point of view of Chinese medicine it is in symbiosis with the lung and the colon. Without medicinal tea, the regenerative efficacy can be felt and is visible from the inside to the outside, after a period of regular intake. Drink at one liter of Pifu tea a day and enjoy the beautiful sense of well-being that arises from within.
