

## Using the Horse Meta-Converter

### What do I need to know?

Position the Horse Meta-Converter as close to your horse as possible. Ideally directly on the horse itself. While riding, the rider wears the Horse Meta-Converter on themselves. Through quantum entanglement, there is an information relay between the rider and horse.

### How long does the Chip last?

It has a service life of at least 30 years.

### i-like Meta-Converter are:

100% Swiss engineering  
100% Swiss made

The Horse Meta-Converter is incorporated into a high-quality box and is, in combination with the small carrying bag, easy to hold.

The bottom line: the Horse Meta-Converter provides valuable vital frequencies for your horse! Apply and experience!

## Who and what is the Horse Meta-Converter for?

The Horse Meta-Converter is suitable for horses and many types of large animals

- on the rider, during the ride
- on the saddle cloth
- under the saddle
- on the bridle
- at the neck ring
- in or on the grazing blanket
- in or on the turnout blanket
- all types of horse blankets
- in the box
- at the feeding station

Ask about further Meta-Converters (chips) and the energetic bioresonant vital products from i-like.

# Horse Meta-Converter for horses and large animals

The Horse Meta-Converter provides valuable frequencies for your horse. The bio-resonance information from the converter is activated via the natural cell radiation (own field broadcasting) of the horse and the frequency will resonate with the animal.

The own field reflection is strengthened by the pyramidal formed minerals in the Converter. This, which is colloquially known as „self healing power“ is described today as self-regulation in line with the most recent quantum physics findings.

The Horse Meta-Converter contains magnetite crystals. This magnetite was programmed via i-like. Through exposure to targeted frequencies, information is applied, which is transferred to the animal.

This frequency provides specific information which are tailored exactly to the horses. This information enables the self-regulation of your horse and helps therefore an improved sense of well-being. Negative information is excluded. The animal quickly feels well.

## This is what owners say, – who have tested the converter

- A rider and a riding teacher for many years, I know my animals very well. Since I have been riding with the Horse-Converter, the horses have been behaving very differently. I feel that they are that they are calmer and less jumpy. Even a quite stormy stallion can be ridden by students with the Converter.
- With the Horse-Box (from i-like) for the horse, we have had only good experiences. In the stable, placing it as close to the horse as possible, during exercise and riding, directly on or by the horse, its trust is significantly increased. I am sure that the horse can feel the energy and is quieter as a result.
- Our horse could hardly move. The vet said that he could barely take away his suffering any longer. A friend gave us the Meta-Converter and put the Meta-Converter onto the horse blanket. After a day, our horse completely changed. The Chip has now been there for two weeks and we are of the opinion that the pain has completely gone, because the 14 year-old animal is moving again just like the young animals surrounding it. Our experience with the Chip has been spectacular and, for a doctor like me, incomprehensible!

### Good to know!

With the Horse Meta-Converter specific information is conveyed, which is tailored precisely to the animals. Through this information, the self-regulation of the horse is activated for an improvement of well-being. The Horse Meta-Converter has an operating radius of 1-2 metres. It comes in a high quality box including a practical bag. The effectiveness of the Horse Meta-Converter is further reinforced with metal. In addition, the box protects against losing the valuable Horse Meta-Chips. Suitable for all horse breeds (from the pony up to heavy horses) and also for other large animals such as lamas, etc.

The bottom line:

Position the Horse Meta-Converter as close to your horse as possible. Ideally directly on the horse itself. While riding, the rider wears the Horse Meta-Converter on themselves. Through quantum entanglement, there is an information relay between the rider and horse.

The **i-like Horse Meta-Converter** is scientifically monitored by the Health Campus at St. Elisabeth University and other institutions.
