

Using the Supplement-Converter

What do I need to know?

Put your Supplement-Converter wherever you store your food supplements. Leave the Converter to work for a minimum of 24 hours or, even better, leave it permanently.

How long does the Chip last?

It has a service life of at least 30 years.

i-like Meta-Converterd are:

100% Swiss engineering
100% Swiss made

Ask about our free application brochure, full of tips and explanations.

The bottom line: vital substances such as vitamins or minerals can be better absorbed with the Supplement-Converter.

Who and what is the Supplement-Converter for?

The Supplement-Converter is suitable for all types of food supplements.

- under the supplement container
- in the medicine cabinet
- in the travel first aid kit
- in your sports bag
- in the cupboard
- in the bathroom cabinet
- on the bed-side table
- in your handbag
- in the desk drawer
- and more

Ask about further Meta-Converters (chips) and the energetic bioresonant vital products from i-like.

Supplement-Converter vitalises dietary supplements

The supplement-converter provides valuable vibrations, which harmonise potential interference frequencies in and on food supplements, as well as other substances you are taking (e.g. chemical formulations).

Through the vitalisation of information based on quantum physics, through opposing the frequencies of disturbance fields, nutrients can be considerably better absorbed. The absorption capacity is vastly increased. Also, potentially negative properties like intolerances or negative reactions to ingredients can be considerably reduced.

Supplements which have been activated with the Supplement-Converter can exhibit considerably increased efficacy. Potential side effects can be reduced, or even got rid of.

Application: place a maximum of 50cm away from food supplements or other substances that you are taking (glue it down, or simply place). Leave to work for a minimum of 24 hours or, even better, leave permanently.

This is what users say, who have tested the Converter:

- I've tried many supplements. From spirulina to omega 3 to drink powders - literally everything. Unfortunately, I have a very sensitive stomach. As soon as I take dietary supplements (regardless whether powder, capsules or whatever), nausea takes over and I feel unwell. However, since I have had the Supplement-Converter on my shelf, this „malaise“ has gone. I can now take the supplements I need, without side effects. Very good!
- Sports drinks are an integral part of my training. Every time I go to the gym, I prepare a litre of isotonic drink to take with me. Now I load up my dietary supplements with the Converter, I feel much more powerful. I have much more stamina and much more power than before. Now I am curious to discover what else the Converter can do for me.
- For some time I have taken various dietary supplements on the recommendation of my doctor. A large part of which is iron. Therefore I'm regularly taking a kind of syrup, which is very ferrous. After I put the Supplement Converter next to my supplements, my levels have vastly improved. Great!

Good to know!

The Supplement-Converter has a sphere of activity from 0-50 cm. It can also be left in its case (instead of fixing it to something) and used in a variety of places. The Supplement Converter should be protected from extreme heat (over 50 degrees Celsius). The Converter is washable. Its effectiveness is further strengthened through metal, and it can also be attached underneath a metal shelf or similar.

The bottom line:

Nutrients can be significantly better absorbed. Your ability to absorb is increased several times over. Potentially negative properties can be significantly reduced.

The i-like Supplement-Converter is scientifically monitored by the Health Campus at St. Elisabeth University and other institutions.
