

## Find out more about Bamboo-Vitalplasters:

This study shows what pH level changes can take place in a patch before and after use.

### Before application

The pH value of a new plaster is about 7.8 - 8.0 = basic

### After application

The pH value of a used plaster is around 3.8 - 4.8 = a large amount of acid was excreted overnight

On the soles of our feet, along with many reflexology zones, there is an acupuncture point called Kidney 1. This serves as the main ex-

plusion point of the body and can be found in the middle of the sole of the foot. By applying the Active-Bioresonance Bamboo-Vitalplaster, this point can be activated.

## Activ-Bioresonance Bamboo-Vitalplasters:

The Active-Bioresonance Bamboo-Vitalplaster and Vitalplaster Bioresonance-Converter team offer you:

- Swiss bioresonance activation technology
- Simple basic application on the soles of the feet
- over 1,000 further possibilities for use
- 4'000 years of experience in the Asian regeneration philosophy paired with western, modern research and development
- Bamboo-high energy plant with well-matured bamboo extract
- certified 100% natural
- certified vegan
- Dr. Masaru Emoto water crystal certified (highest energy award)
- 3- to 8-fold higher effectiveness, compared to previous Vitalplasters
- Balanced formulation in YIN and YANG, according to the five elements

# Activ-Bioresonance Bamboo-Vitalplasters

Regeneration and balancing while you sleep. Active-Bioresonance Bamboo-Vitalplasters are probably the easiest and therefore best solution for increasing your well-being. The patches are easily stuck on overnight onto the soles of both feet. In the middle of the

sole of the foot, there is the acupuncture point Kidney 1, which serves as THE main expulsion point of the body. So the plasters easily offer you new energy and vitality while you sleep. They can be applied daily or as needed.

## Use

Stick Active-Bioresonance Bamboo-Vitalplasters onto your washed feet each night for 30 nights. After sleeping the patches may be removed. They are usually soaked and sluggy-brown. But purely energetic changes are also noticeable.

Before use

After use

In addition to the main application in the middle of the sole of the foot, there are almost countless other points on feet, legs as well as on the whole body, which can be

activated with the Active-Bioresonance Bamboo-Vitalplasters. The possibilities can be elucidated in technical literature, as well as via the personal advice of consultants.

# The big difference!

For almost two decades Vitalplaster have been used in Europe. Since their creation through to the present day, some manufacturers have significantly increased the quality and efficiency.

With the i-like expertise in the Five Elements doctrine of Asian regeneration philosophy in balance of Yin and Yang, paired with the i-like bioresonance technology from Switzerland, developed for over 20 years, they have now succeeded in considerably increasing the effectiveness of the newest generation of Vitalplasters. The Vitalplasters contain silicon concentrate from bamboo (77% silicon content) which is supercharged through the unique-in-the-world technology.

After several energy chargings the former „Bamboo-Vitalplasters“ become „Active-Bioresonance Bamboo-Vitalplasters“. The increased efficacy can be measured through energy and

bioresonance measurements can be shown to be around three times more effective than previous plasters. Reflexology zones on the soles of the feet, but also many other places on the body (acupuncture points) are optimally revitalized by the new technology.

The functionality of the new Active-Bioresonance Bamboo-Vitalplasters can be increased still further if you also activate the plasters in the Bioresonance-Converter for 24 hours or longer. The activated energy increases the potency of the Active-Bioresonance Bamboo-Vitalplasters to double what it was. The result in this case is a 6- to 8-fold increased Vitalplaster effectiveness, compared to the previous Vitalplasters.

Charge your Active-Bioresonance Bamboo-Vitalplasters additionally for a minimum of 24 hours (could also be longer) in the Vitalplaster Bioresonance Converter!

**The bottom line: Active-Bioresonance Bamboo-Vitalplasters are easy to use, highly effective and let the user quickly sense, what changes can be achieved. The first night can be an experience in itself. Simple „stick on and experience.“**

The revolutionary Active-Bioresonance Bamboo-Vitalplasters have been developed as a result of many years of research, applications and experience and lies in through purity and through many further distinctions. Additionally, they are vegan and certified 100% natural.

Through the Hado-Life laboratory – Dr. Masaru Emoto water crystal certified.

Experience the difference and the increase of well-being through the bioresonance-optimised Bamboo-Vitalplasters.
