

## Using the Water-Chip

### What do I need to know?

Glue the Water-Chip to your water bottle, water purifier and all kinds of water containers and leave for a minimum of 30 minutes. Ideally, allow activation to take effect over 24 hours (drinking water storage tank). Use the Chip for the duration.

### How long does the Chip last?

It has a service life of at least 30 years.

### i-like Meta-Converter are:

100% Swiss engineering  
100% Swiss made

Ask about our free application brochure, full of tips and explanations.

The bottom line: harmonise and vitalise your water for a fresh, powerful and living water.

## Who and what is the Water-Chip for?

The Water-Chip is suitable for everything to do with liquids.

- on the water purifier
- in the beverage store
- under the water jug
- on the sports bottle
- on the kettle
- on the coffee machine
- under the wine bottle
- under the teapot
- on the cup holder (in the car)
- under the watering can
- and many more

Ask about further Meta-Converters (chips) and the energetic bioresonant vital products from i-like.

# Water-Chip for vitalised water

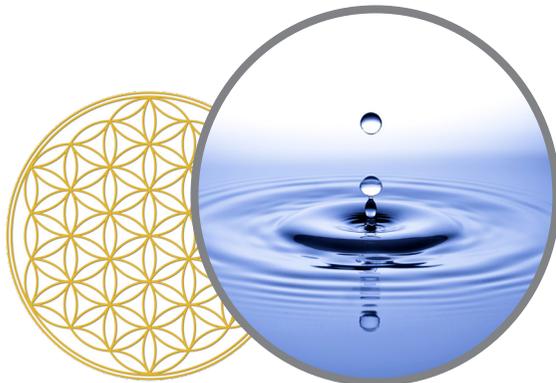

Water is probably one of the largest storers of information on the world has ever seen. From the day it emerges from the source, it begins to absorb and save information. Spring water is vital and energetic and has a particularly soft and mild taste.

Through environmental influences, pollution or disinfection, water often loses its positive properties. More and more substances like pesticides, nitrates, hormones and also many medical drugs in higher concentrations get into our drinking water. During the treatment of drinking water, there are also many treatment procedures and chemicals are used to disinfect the water and remove unwanted substances. Our drinking water is therefore safe to drink, but often lacks the original purity, strength and vitality of water.

By treating water, through pressure in pipes and also via waves from mobile phones and radios (electro-smog), water loses its liveliness and goes limp.

This is when to use the Water-Chip. Thanks to the „Water-Chip“, water molecules are positively aligned. This creates new, easily flowing information (Gu Qi = food energy) in water. The result is a soft, very harmoniously informed water. The redox potential for water (antioxidants) is significantly improved. Since the human body consists of 70% water, a harmonious and well-informed water is required for vitality and a feeling of well-being.

With the Water-Chip, you can achieve precisely that!

# Emoto water crystal

Via the Emoto laboratory (Hado Life), an energy measurement was carried out with the Meta-Converter and water. In order to do this, a glass of neutral water (see below, osmosis water) was vitalised for one hour with the Meta-Converter. The result after one hour is absolutely amazing and shows what a wonderful change in frequency the i-like Chip can achieve.

## Testing evidence and measurements

**Example:** osmosis water was vitalised with the chip from i-like. The result is amazing!

Prior to application,  
without the Chip.

After an hour,  
with a Chip.

The measurement by the Emoto laboratory (Hado Life) shows what positive frequency changes can be achieved with the chip.

## Good to know!

The Water-Chip has a sphere of activity from 30-50 cm. It can either be attached with glue, or left in the packaging and used in various places. The Water-Chip should be protected from extreme heat (over 50 degrees Celsius). That means no Water-Chip on the kettle (at least not directly on the jug), etc. The Chip is washable. Its effectiveness is further reinforced by metal (it can therefore also be attached to metal containers, etc). Ideally, leave the Water-Chip to work on a water container for 24 hours. This means that the redox potential (antioxidation) is perfected.

The bottom line:

With the Water-chip the stability and order of the water is established and brings the original properties of water back: lively, fresh and powerful. The result is a soft, very harmonious water with high antioxidant activity.

The **i-like Water-Chip** is scientifically monitored by the Health Campus at St. Elisabeth University and other institutions.
