

# Converter Use

## What do I need to know?

Attach the water converter to the water bottle, water purifier and all types of water containers and let it act for at least 30 minutes. An activation of over 24 hours (drinking water supply) is ideal. Use the water converter permanently.

## How long does the converter work?

Its effectiveness lasts for at least 30 years.

## i-like meta-converters are:

100% Swiss Engineering  
100% Swiss Made

## Effects of the water converter:

Thanks to the water converter, water molecules are aligned in a positive way. This creates new, easily flowing information (Gu-Qi = food energy) in the water. The result is water that is harmoniously informed.

# Use of the water converter

The water converter from i-like is suitable for all types of liquids. It is used wherever liquids are stored:

- on the water purifier
- in the beverage storage
- under the water jug
- on the sports bottle
- on the water boiler
- on the coffee machine
- under the wine bottle
- under the tea pitcher
- on the cup holder (car etc.)
- under the watering can
- and much more.

Benefit from other bioresonance products, such as meta-converters, sinus Body, Bamboo-Vitalplasters, CurSun+, Vitaldrink, F.X.-Balance products, bioresonance cosmetics and many other valuable helpers in everyday life!

# Vital, powerful and energetic water

Water is probably one of the largest information carriers the world has ever seen. From the day it emerges from its source, it begins to record and store information. Fresh spring water is vital and rich in energy and has a particularly mild taste.

However, water often loses its positive properties due to environmental influences, contamination or disinfection. More and more substances, such as pesticides, nitrates, hormones and many pharmaceutical agents are entering our drinking water in high concentrations.

When drinking water is treated, the different treatment processes also employ chemical substances to disinfect the water and remove unwanted substances. Although it makes our drinking water drinkable, but this water has usually lost its original purity, strength and vitality.

As a result of water treatment, pipe pressure, electromagnetic waves from mobile phones and general electromagnetic contamination, water loses its vitality and becomes lifeless.

This is where the water converter comes in. It aligns water molecules positively. This creates new, easily flowing information (Gu-Qi = food energy) in the water. The result is very harmoniously informed water. The redox potential (antioxidants) in the water is significantly improved. Since we humans consist of 70% water, well-informed water is a prerequisite for our vitality! With the i-like water converter, this is now within your reach!

**Conclusion:**  
Vital, fresh and powerful water.

With the water converter, stability and order are built up in the water.

# Emoto Hado-Life Laboratory Water crystal certification

## Test evidence and measurements

The Emoto (Hado-Life) laboratory carried out an energy measurement using the converter and water. Neutral water (see below, osmosis water) in a glass was vitalised for one hour with the meta-converter. The result after one hour is absolutely astonishing and shows the wonderful frequency changes that the i-like meta-converter is able to achieve.

## Test evidence and measurements

Example: Osmosis water was vitalised with the converter technology from i-like. The results are amazing!

Before being applied,  
without converter.

After an hour  
with converter.

Although the two images on the right and left are made up of chemically identical substances ( $H_2O$ ), the change in information with the converters can be clearly seen. The measurement by the Hado Life laboratory shows how positive frequency changes can be achieved with the converter.

**The human body consists of 70 % water.**  
How would you like “your water” in your body?

**Conclusion:** Start using the water converter at home, in the office or on the go. The idea is to place the converter under every carafe, water tank, car cup holder and child's drinking bottle.

The i-like water converter is scientifically supported by the health campus of St. Elisabeth University and other institutions.

Campus**

Aussenstelle für das deutschsprachige Europa der St. Elisabeth Universität

## Good to know!

The water converter is suitable for use on all containers for liquids, such as jugs, bottles and canisters. The converter can be glued directly onto the object, or left in its packaging and placed within a radius of max. 30 cm from the object. The converter must not be bent, cut off or otherwise deformed. The converter is not waterproof (but is splashproof).

With the water converter,  
water molecules are  
unclustered and vitalised.
