

Using the OptimizAir

What do I need to know?

The OptimizAir is an air filtration system that can be used anywhere in your living and working environment. The electronic device is suitable for rooms up to 50 m².

How to use the OptimizAir?

The OptimizAir can be used in a wide variety of indoor spaces and is equipped with five speed settings, a timer, night mode, fragrance container and is also quiet when in operation.

E-smog harmonisation

Thanks to unique i-like technology, e-smog is harmonised via the HPP™ filter with high-voltage technology!

Air purification up to 50 m²

Efficient air purification, quiet operation, with washable HPP™ filter system and fragrance container.

Filters 99.97% of all viruses and bacteria

Fine dust, pollen, dust mite excretions and mould are also neutralised thanks to high-voltage technology.

With a bamboo activated carbon filter

Bamboo power gives you excellent air purification, harmonisation of Qi (energy) and thus a feeling of well-being.

Swiss technology

With integrated frequency technology from i-like. Designed and developed in Switzerland.

Use of the OptimizAir

The OptimizAir is suitable for all indoor living and working spaces for adults and children to vitalise and purify the air they breathe. Use the OptimizAir:

- for air purification
- for vitalisation
- for scenting
- in the kitchen
- in the living area
- in the dining area
- at the workplace
- in the school
- and much more

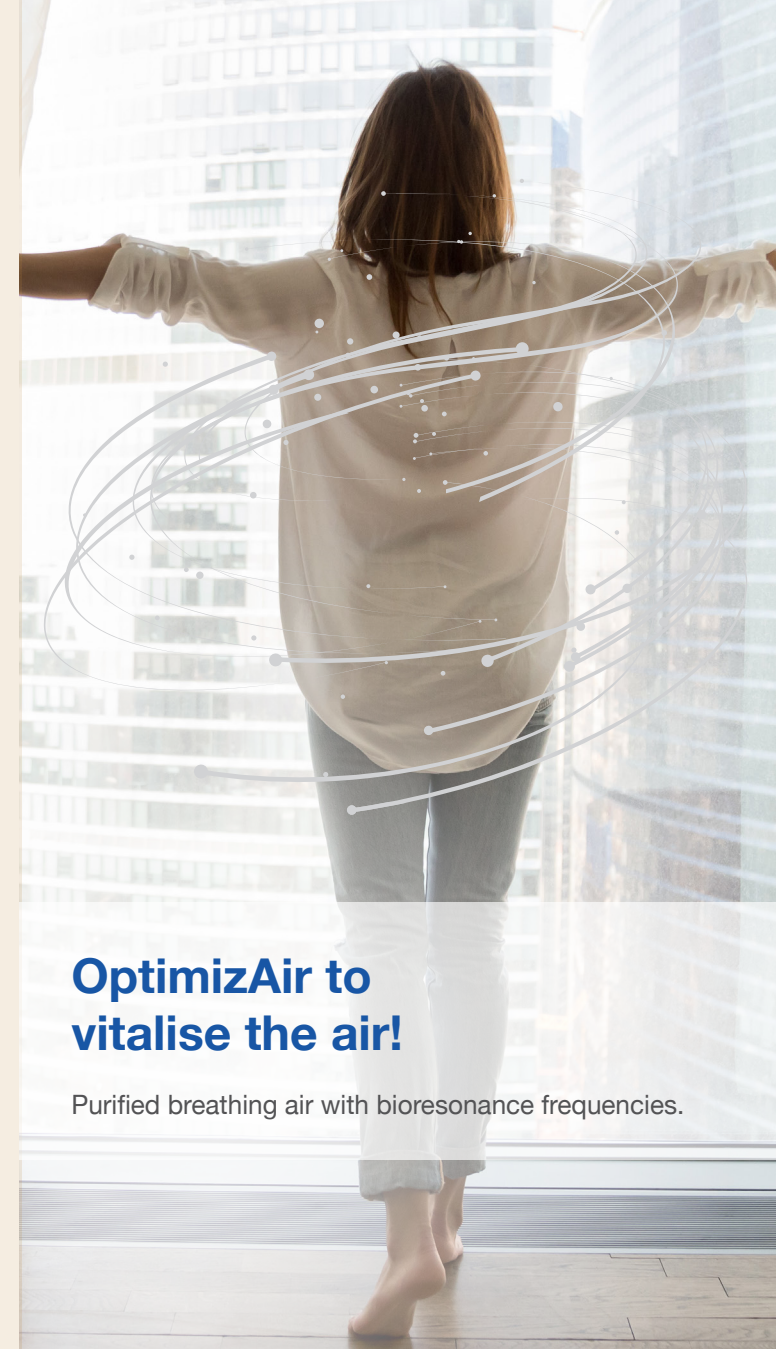

Benefit from other i-like bioresonance products, such as Meta-Converters, sinus 25 Room-Converter, sinus Body, CurSun+, ProWheyDrink, ProMetaVit, bioresonance cosmetics and many other valuable aids in everyday life!

Fresh breathing air for your feeling of well-being

Do you want to feel good because of good air that is as free as possible from pollution, harmonises electrosmog and at the same time provides a lot of energy (Qi)?

The air transports a lot of what we need to live and at the same time a lot of what is harmful to us. Oxygen and other gases are good. Unfortunately, viruses, bacteria, pollen, excretions of dust mites, mould spores, fine particles of exhaust fumes (car, heating, industry, etc.) and much more also enter our body through breathing. In addition, we also absorb information (frequencies) caused by environmental pollution through the air we breathe.

The air we breathe, therefore, has an influence on our personal well-being. Use the OptimizAir in your living space and benefit from pure breathing pleasure.

Thanks to the efficient combination of three different filter technologies (including bamboo activated carbon filters), the integration of i-like technology and the scenting option with compositions of natural essential oils, you get excellent breathing air. In addition, you benefit from positive frequencies to promote bioresistance due to the i-like technology. Thanks to the OptimizAir air charged with frequencies, you take in harmonised air and thus optimise your feeling of well-being.

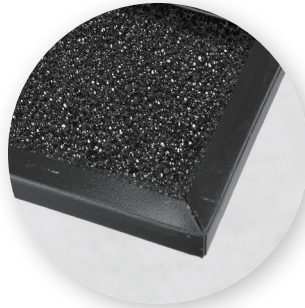

The i-like bamboo activated carbon filter is not only used for optimal air purification but also for effective odour neutralisation and harmonisation of the air we breathe thanks to the power of bamboo.

Effective air purification inc. frequency technology

Use the OptimizAir in your home in the living and dining area and bedroom, but also at work, university, school and wherever you spend a long time.

Effektive Luftreinigung dank drei Filtersystemen:

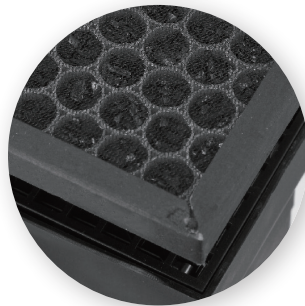

Basic Filter

The Basic Filter removes coarse dust particles and dirt from the air and thus optimises the functionality of the subsequent filters.

HPP™ Filter System

The HPP™ filter system filters 99.97 % of all viruses, bacteria, fine dust, pollen, dust mite excretions and mould from the air.

Bamboo Carbon Filter

The Bamboo Carbon Filter can absorb gases present in the air and thus filter them out of the air. In addition, the bamboo carbon vitalises the purified air.

Regular cleaning of the washable HPP™ filter system and regular replacement of the Basic and Bamboo Carbon filters will keep your room air fresh and fragrant for a long time.

Whether for neutralising bad odours, neutralising viruses and bacteria, air purification from pollen or other airborne allergens, harmonisation or simply scenting your living and working space, the OptimizAir impresses with its universal application possibilities.

The most important facts in brief:

- efficient air purification
- low-noise operation
- for rooms up to 50 m²
- washable HPP™ filter
- easy replacement of the Bamboo Carbon and Basic filters
- with fragrance container for essential oils
- with integrated timer and night mode
- five speed settings
- modern design

Fragrance compositions with a function

The built-in aromabox also provides you with feel-good fragrances with a function. Pleasant fragrances wherever you use the OptimizAir. Immerse yourself in the i-like fragrance compositions of *Well-being*, *Concentration*, *Vitality* and *Good night*
